

Willem Einthoven

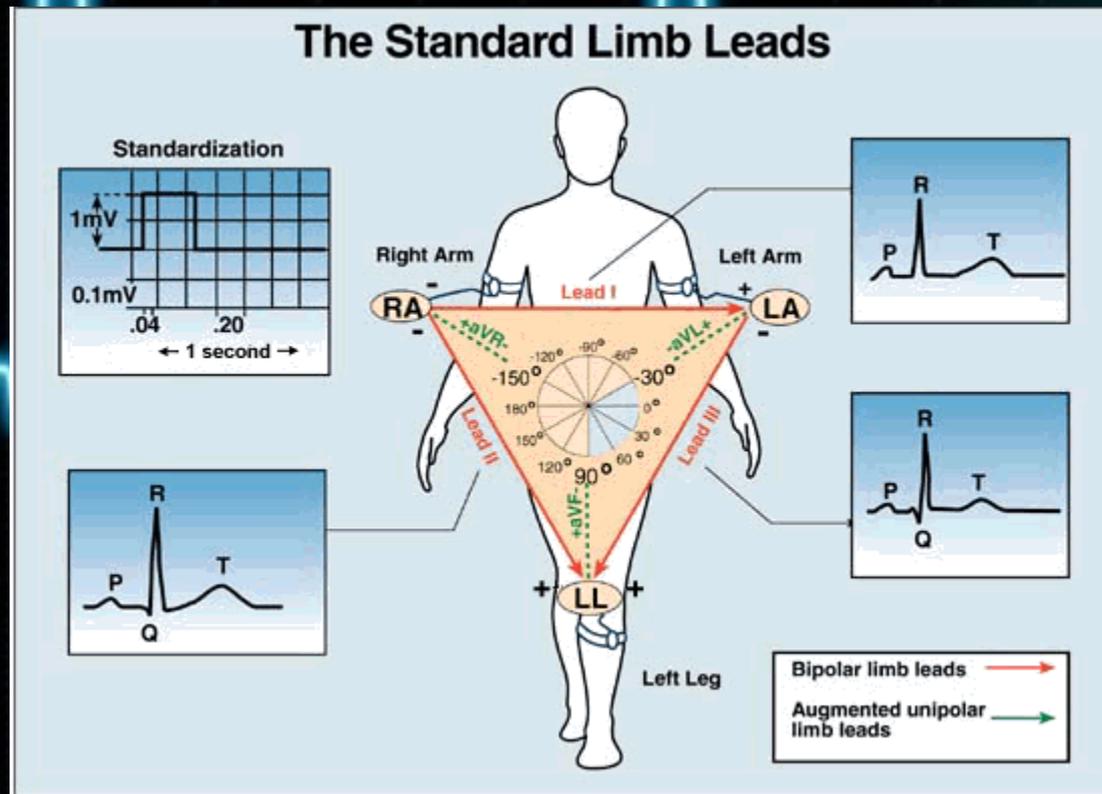

Einthoven's Triangle

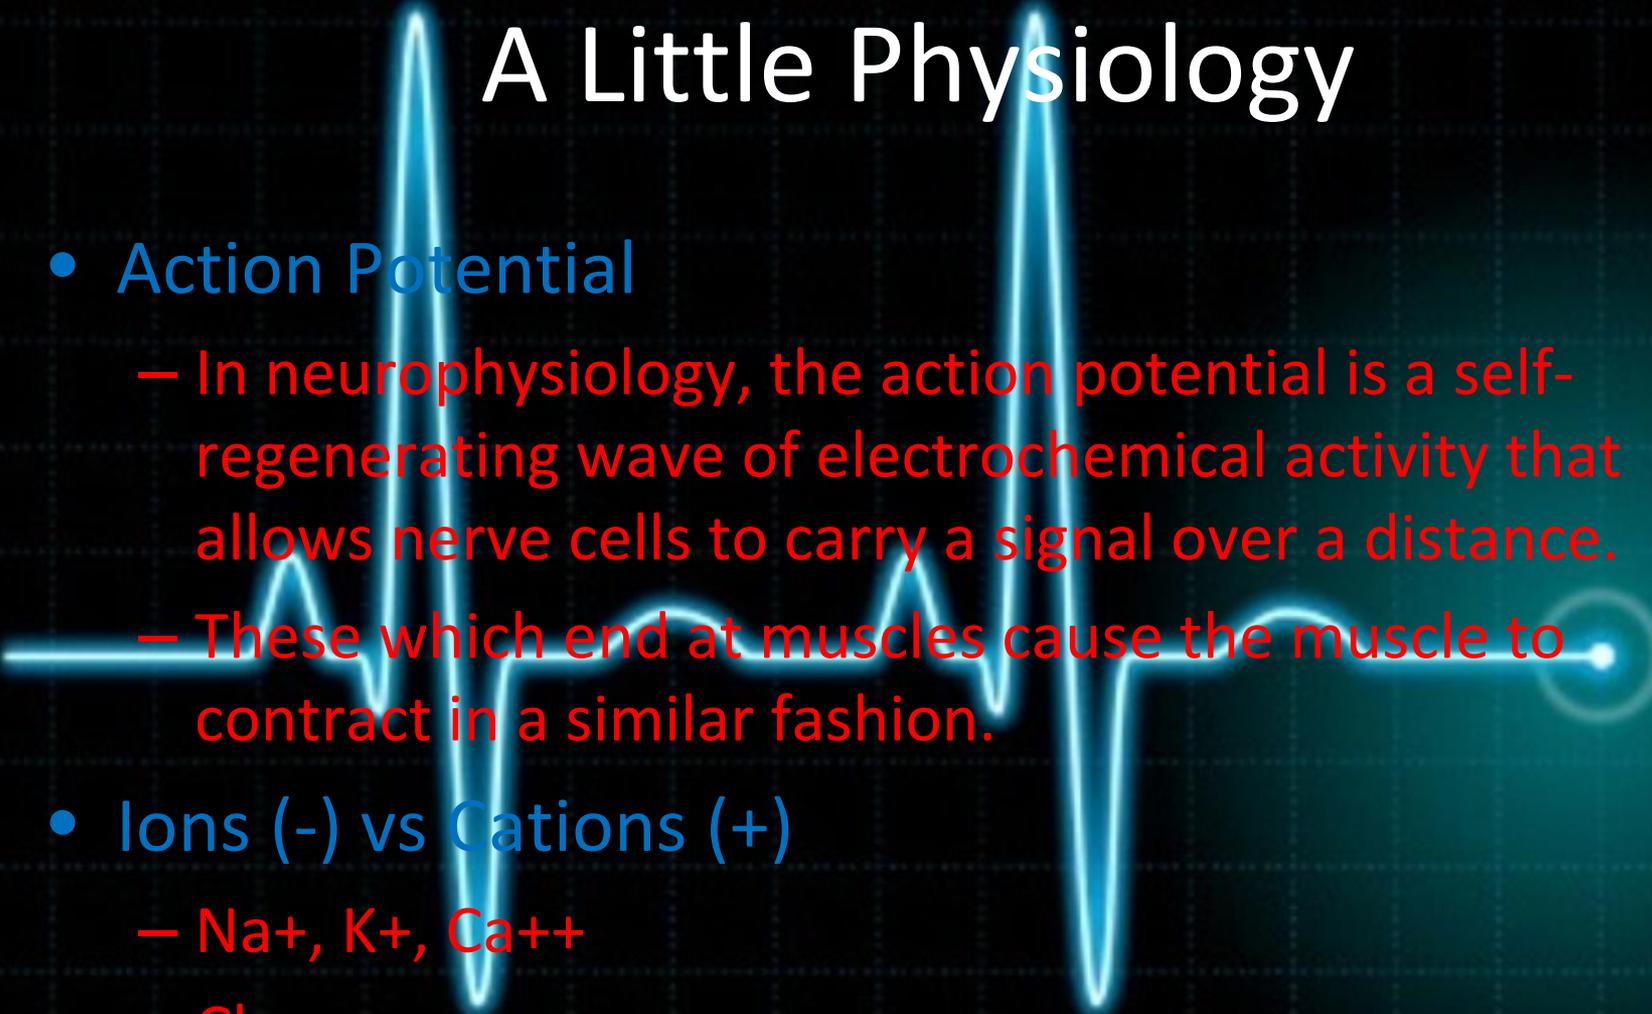

Simply:

EKGs measure the direction of electrical flow through the heart.

A Little Physiology

- Action Potential

- In neurophysiology, the action potential is a self-regenerating wave of electrochemical activity that allows nerve cells to carry a signal over a distance.
- These which end at muscles cause the muscle to contract in a similar fashion.

- Ions (-) vs Cations (+)

- Na^+ , K^+ , Ca^{++}
- Cl^-

Why a little physiology is good for you.

(7) 5 H's

- HYPOVOLEMIA
- HYPOXIA
- HYDROGEN IONS
- HYPOKALEMIA
- HYPERKALEMIA
- HYPOGLYCEMIA
- HYPOTHERMIA

(6) 5 T's

- TOXINS & TABLETS
- TAMPONADE, CARDIAC
- TENSION PNEUMOTHORAX
- THROMBOSIS, CORONARY
- THROMBOSIS, PULMONARY
- TRAUMA

A glowing blue ECG line is centered on a dark blue grid background. The line shows a regular rhythm with two prominent peaks and two deep troughs. The text 'Reading Rhythms 101' is overlaid on the line.

Reading Rhythms 101

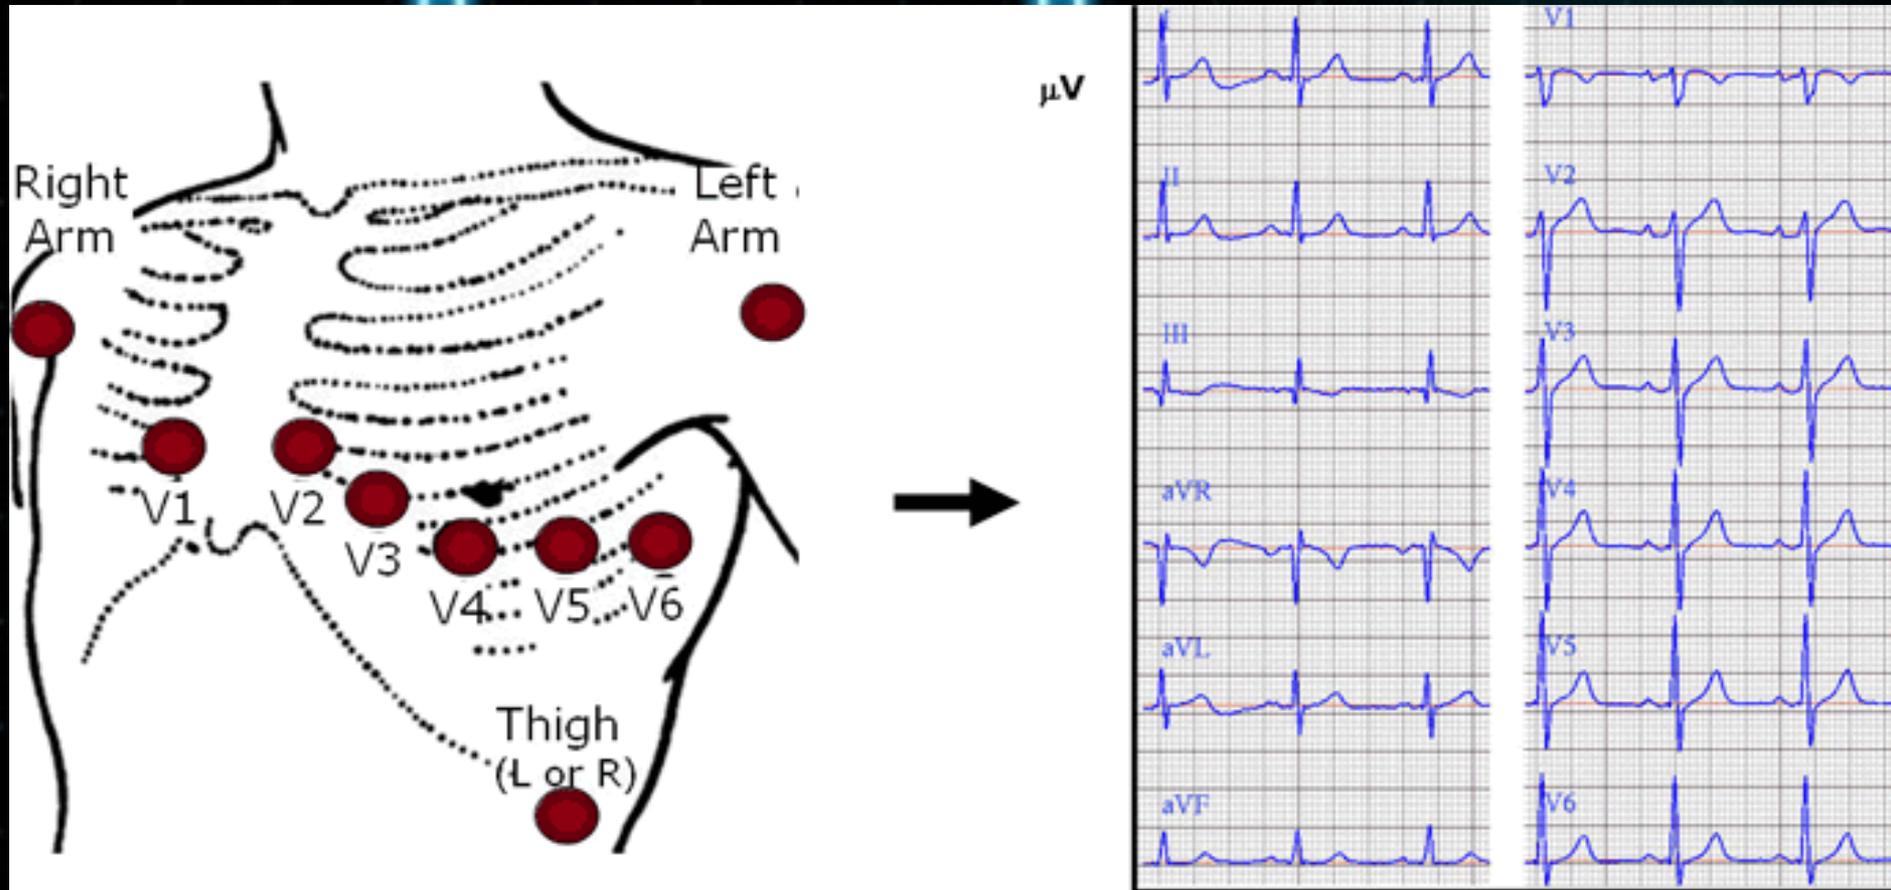

Rule 1: Live and conscious people
don't enjoy 200 Joules

The Leads

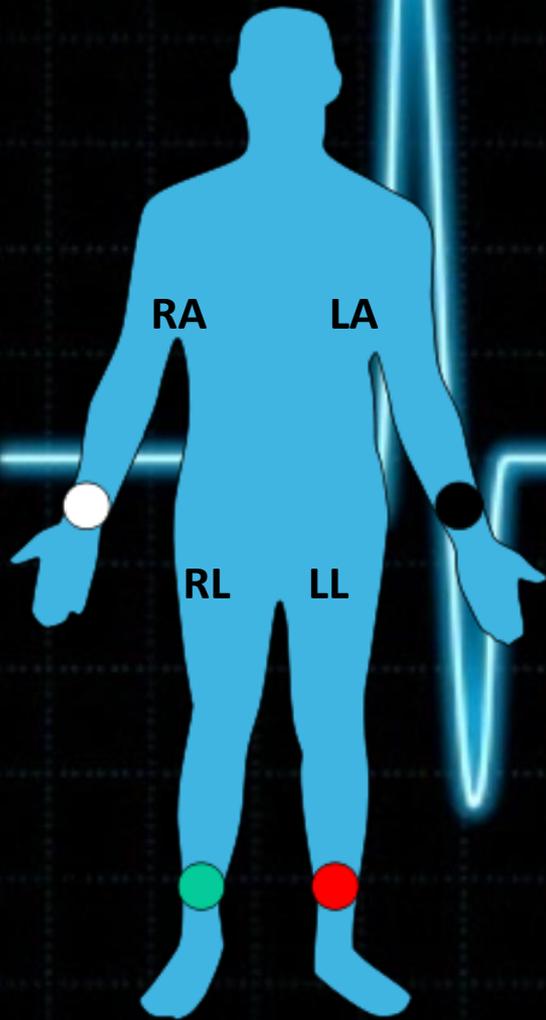

- 12 – lead
- 3 or 4 – lead
- Defibrillation Pads
- Emergency Paddles

12 - lead

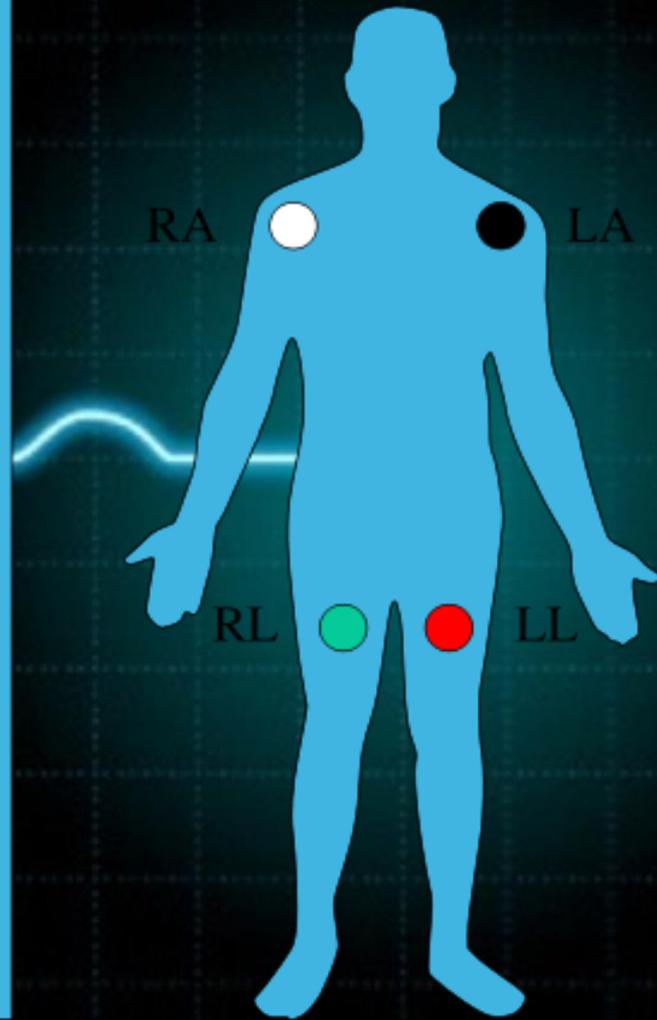

3 or 4 - lead

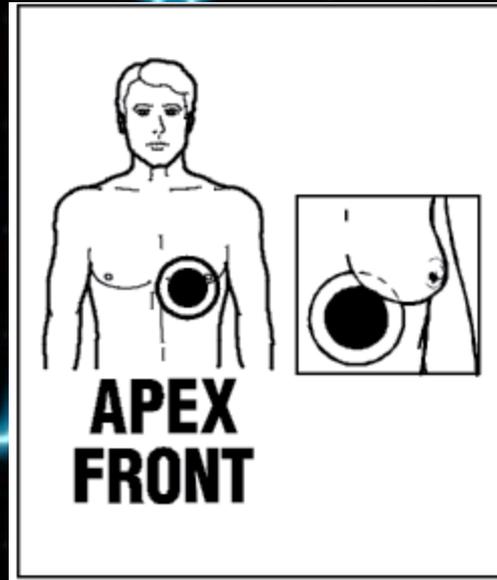

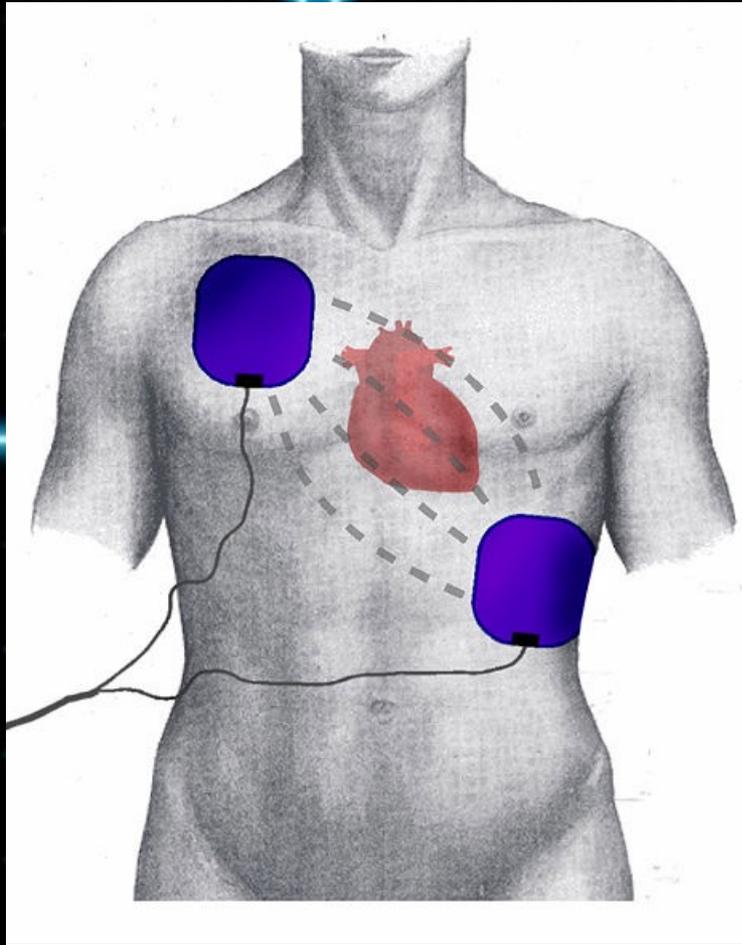

RA = Right Arm
LA = Left Arm
RL = Right Leg
LL = Left Leg

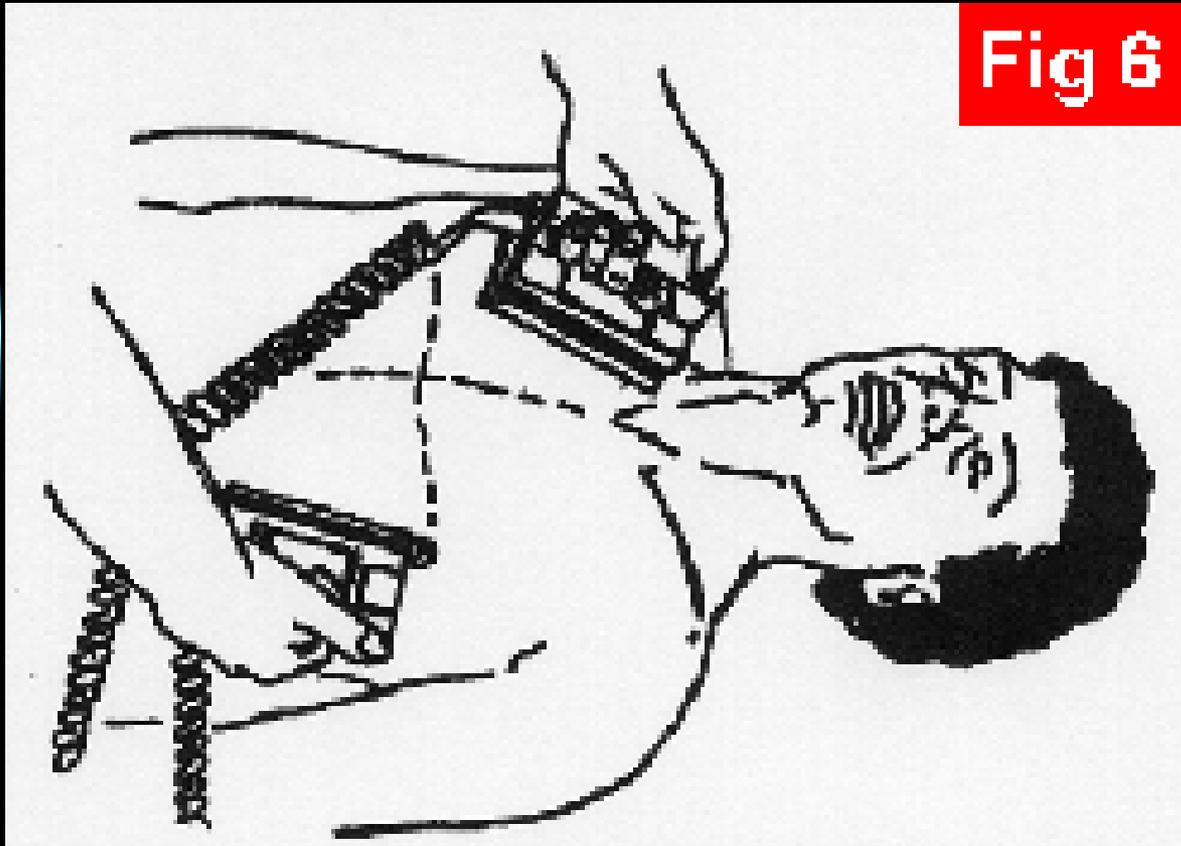

RA - White
LA - Black
RL - Green
LL - Red

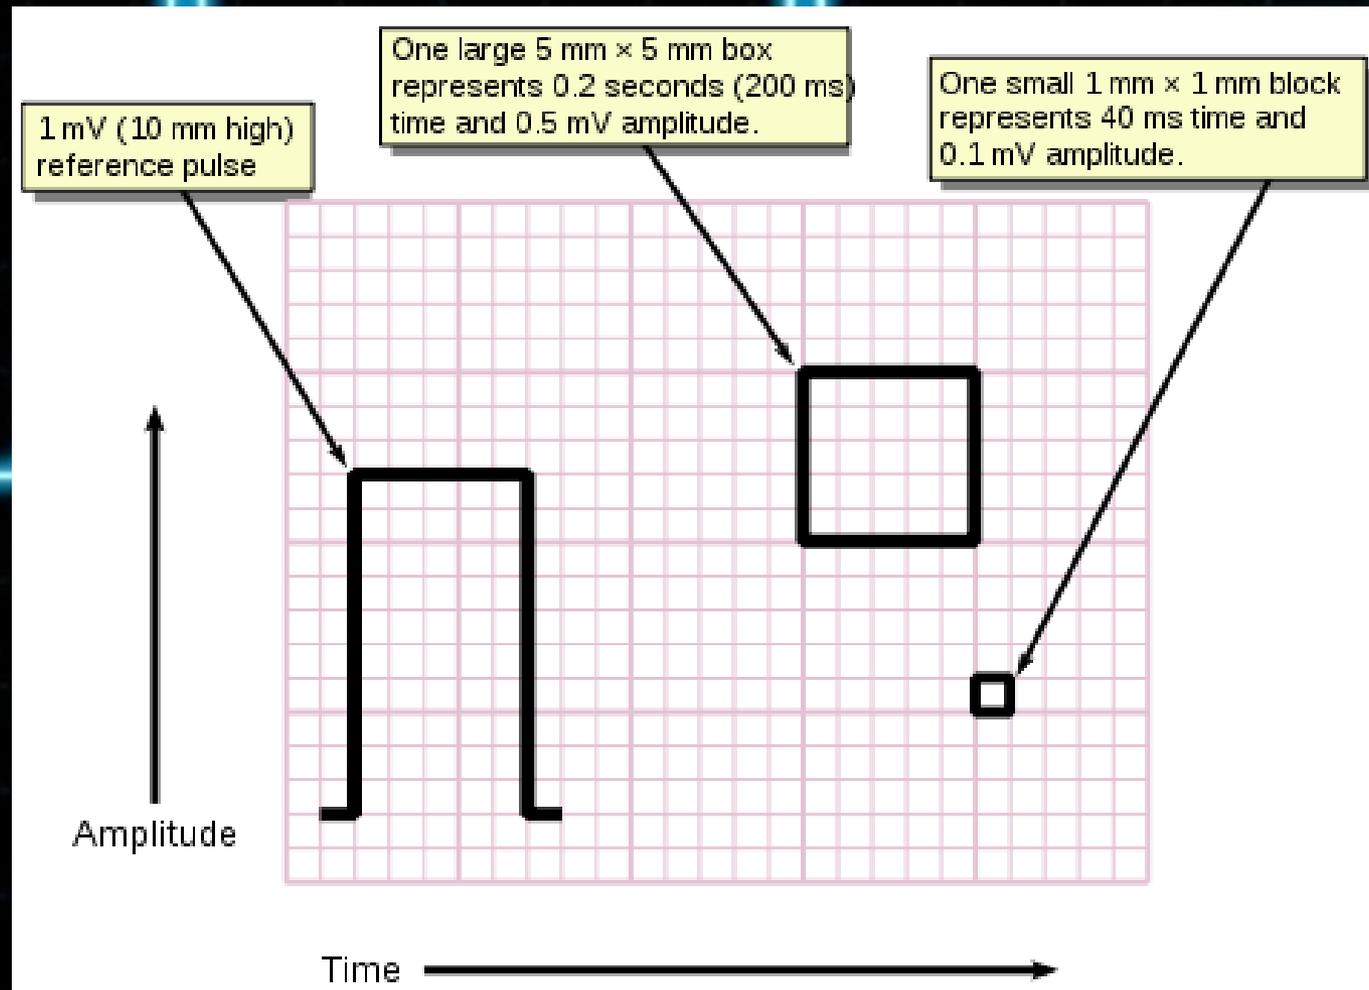

Defibrillation Pads

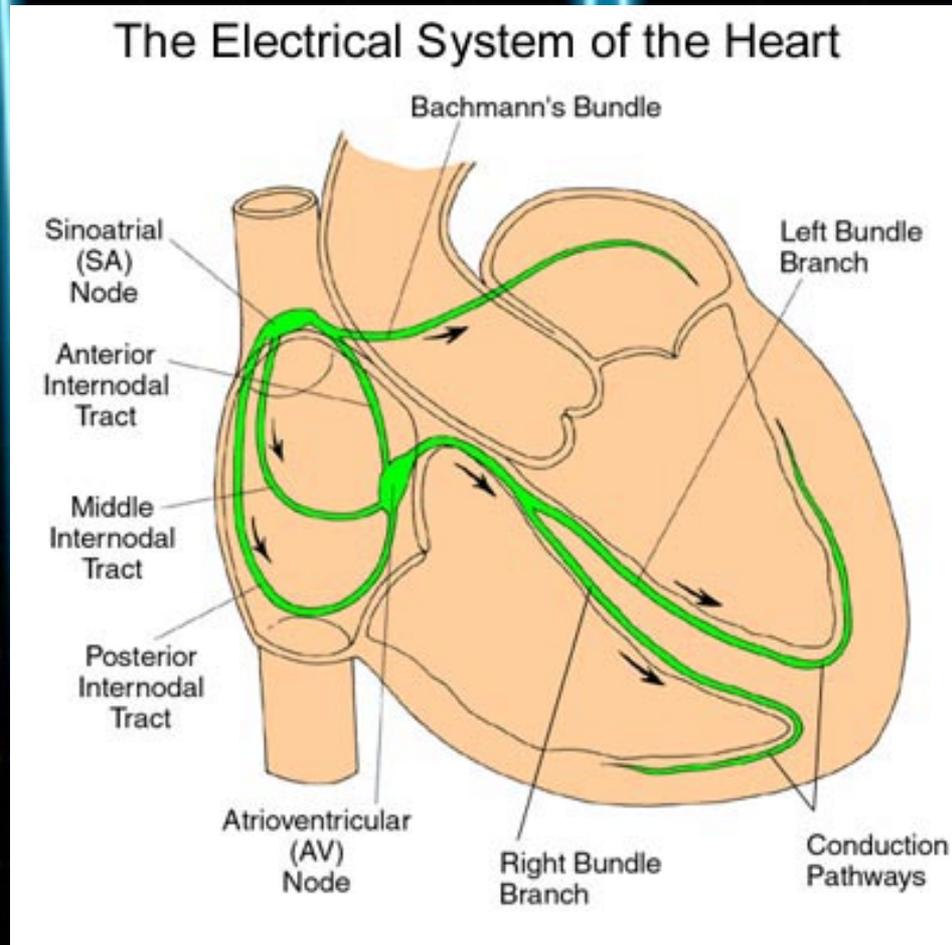

Emergency Paddles

Anatomy

The Breakdown

5 keys to unlock any rhythm

1. Rate
 - 60 – 100 bpm
2. Rhythm
 - Reg. / Reg.
3. PR interval
 - .12 - .20 sec.
 - 1:1 ratio
4. QRS Complex
 - .08 - .10 sec.
5. ST Segment
 - .12 - .20 sec.
 - Elev. / Dep.

4 Origins

1. SA Node

– 60-100 bpm

2. Atria

– 60-100 bpm

3. AV Junction

– 40-60 bpm

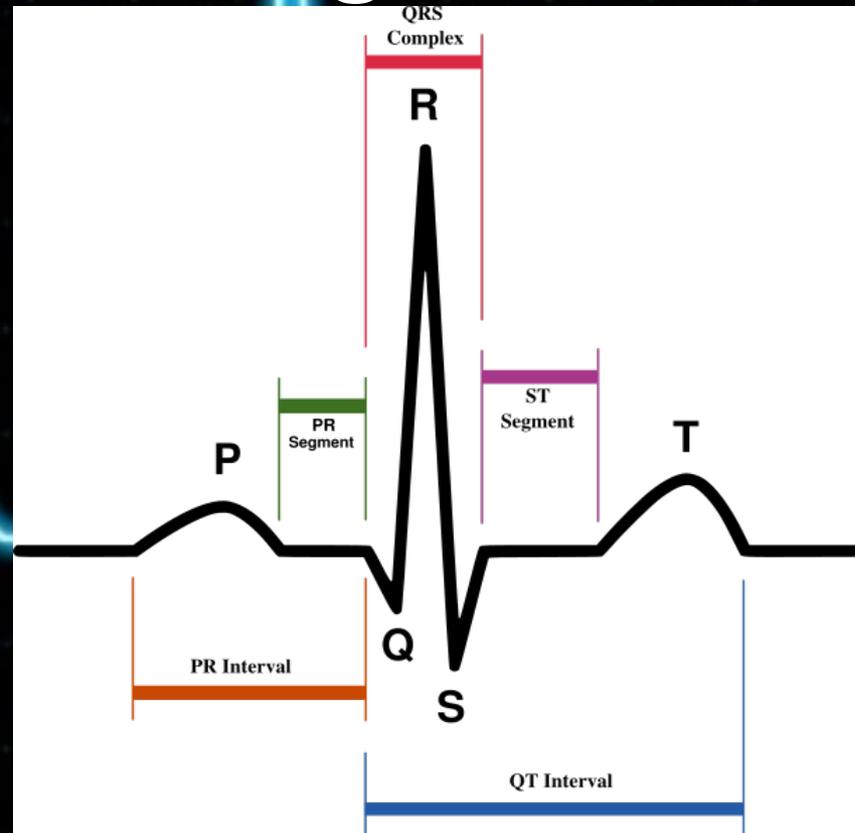

4. Ventricles

– 20-40 bpm

Waves and Segments

1. Rate
 - 60 – 100 bpm
2. Rhythm
 - Reg. / Reg.
3. PR interval
 - .12 - .20 sec.
 - 1:1 ratio
4. QRS Complex
 - .08 - .10 sec.
5. ST Segment
 - .12 - .20 sec.
 - Elev. / Dep.

Sinus Rhythms (SA Node)

- Normal Sinus Rhythm
- Sinus Bradycardia
- Sinus Tachycardia
- Sinus Arrhythmia

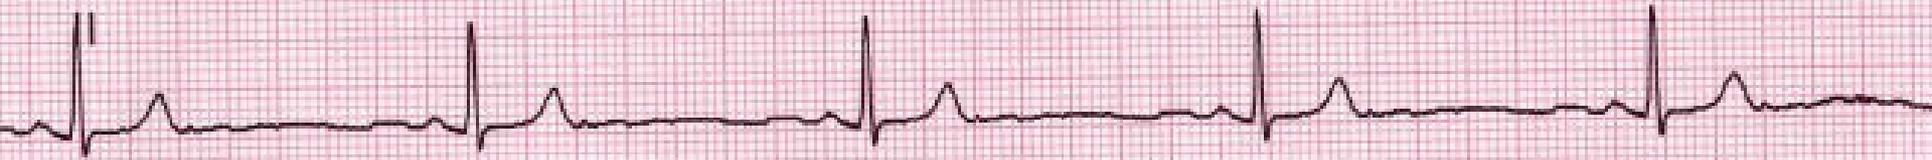

Normal Sinus Rhythm

Sinus Bradycardia

ID#: 050107213625 1May07 21:42:52 HR:37

Sinus Tachycardia

Sinus Arrhythmia

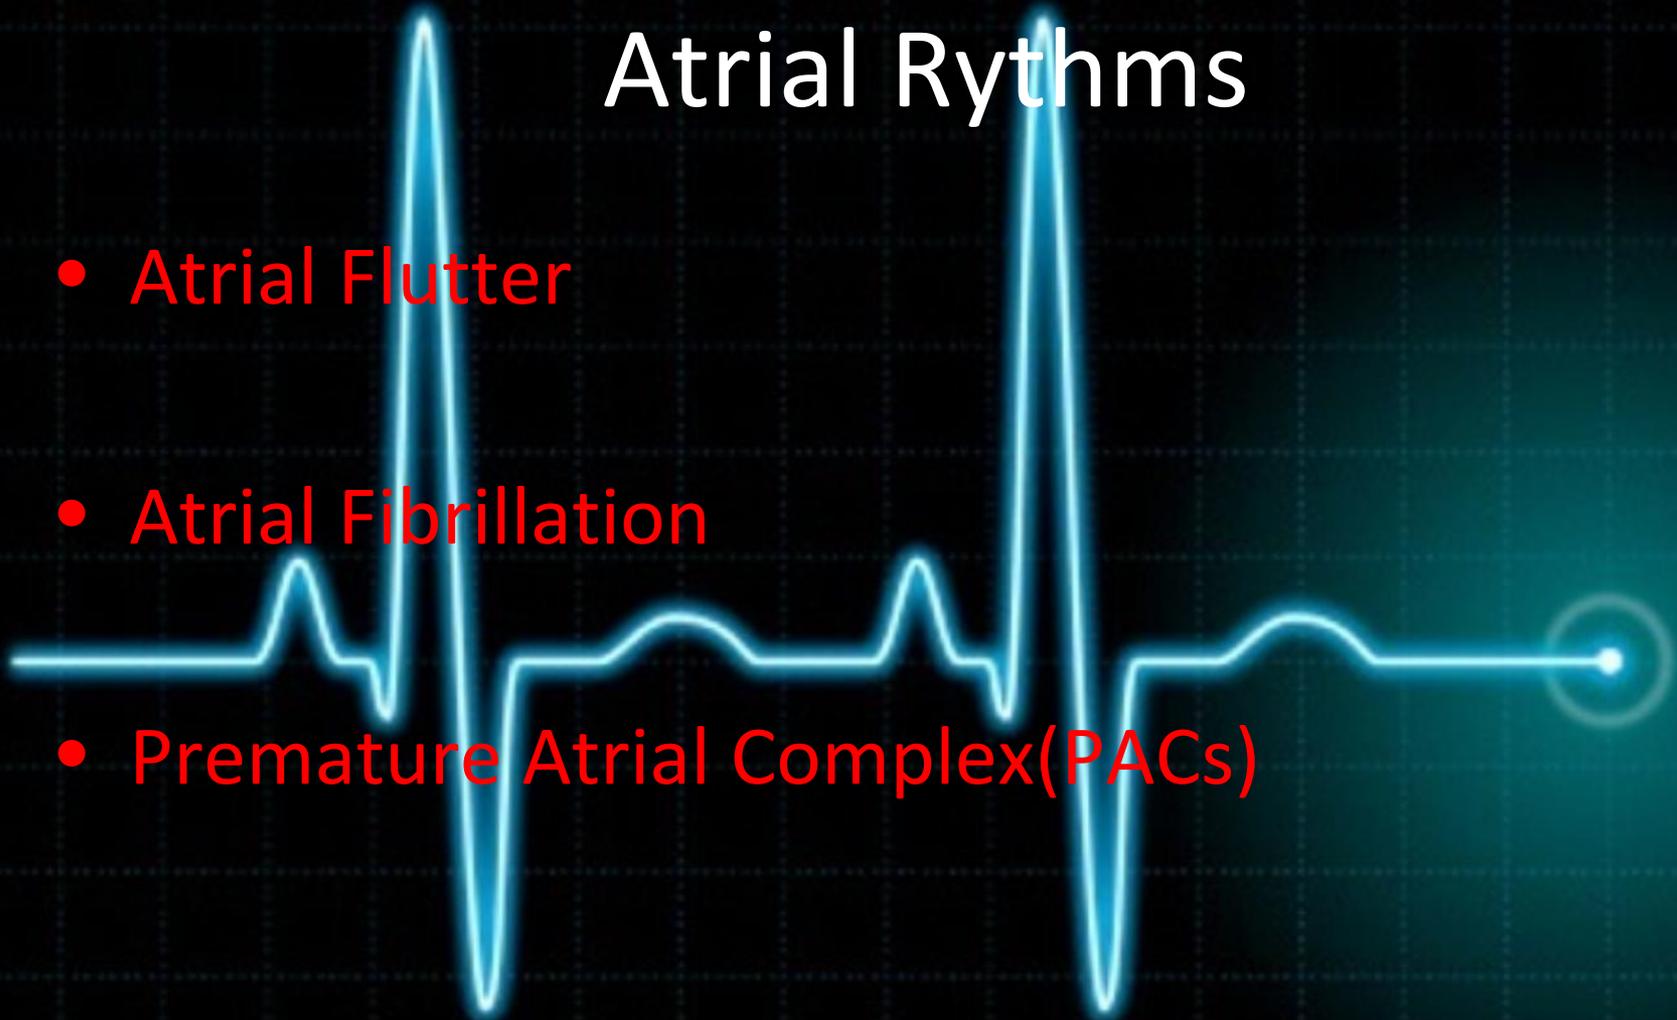

SINUS ARRHYTHMIA

Atrial Rhythms

- Atrial Flutter
- Atrial Fibrillation
- Premature Atrial Complex(PACs)

Atrial Flutter

Atrial Fibrillation

Premature Atrial Complex(PAC)

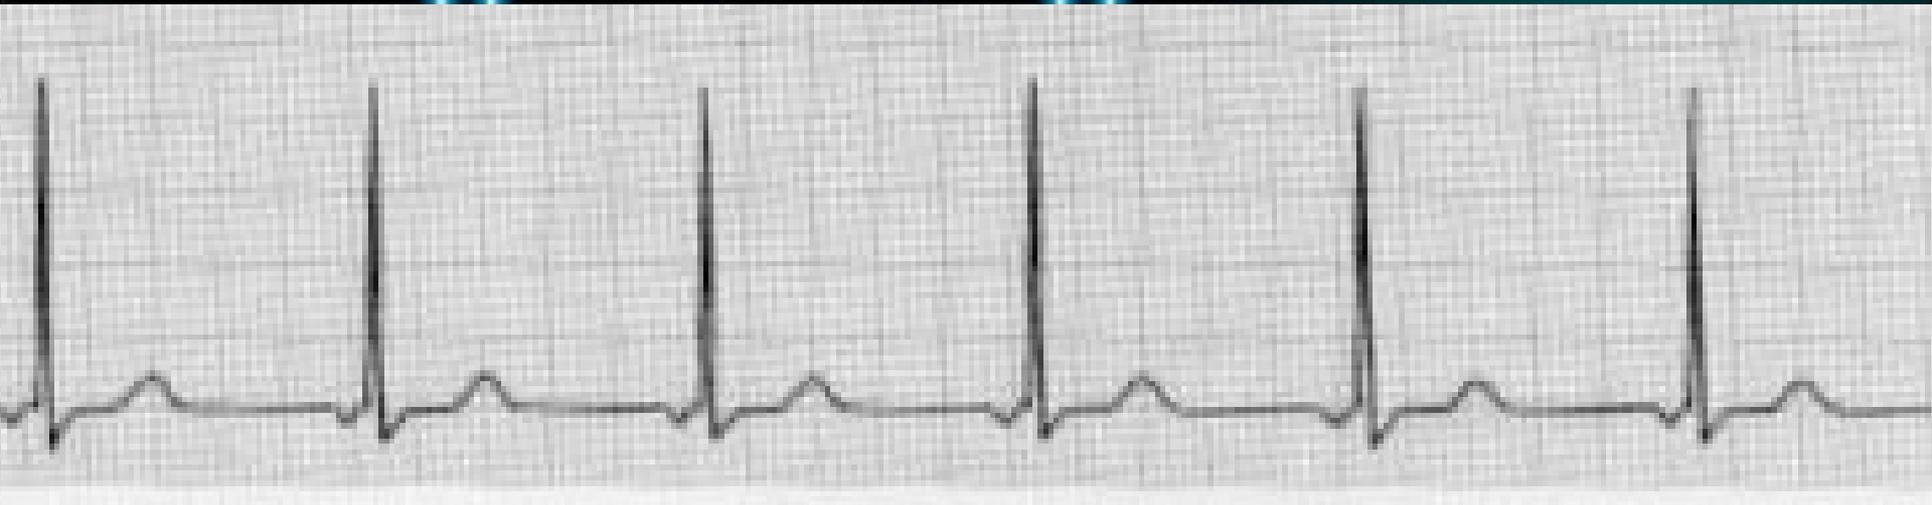

Junctional Rhythms (AV Junction)

- Junctional Escape Rhythm (Bradycardia)
- Accelerated Junctional Rhythm
- Junctional Tachycardia
- Premature Junctional Complex

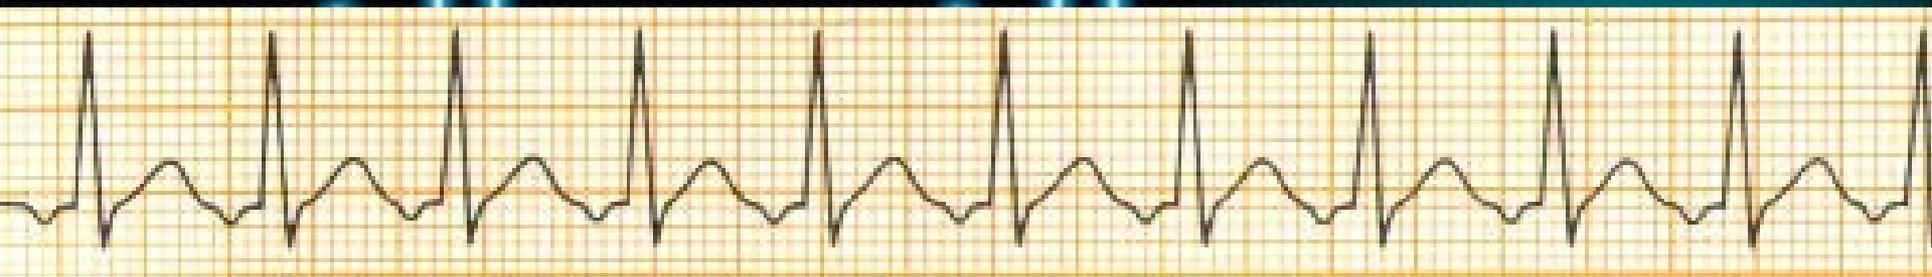

Junctional Escape Rhythm

Accelerated Junctional Rhythm

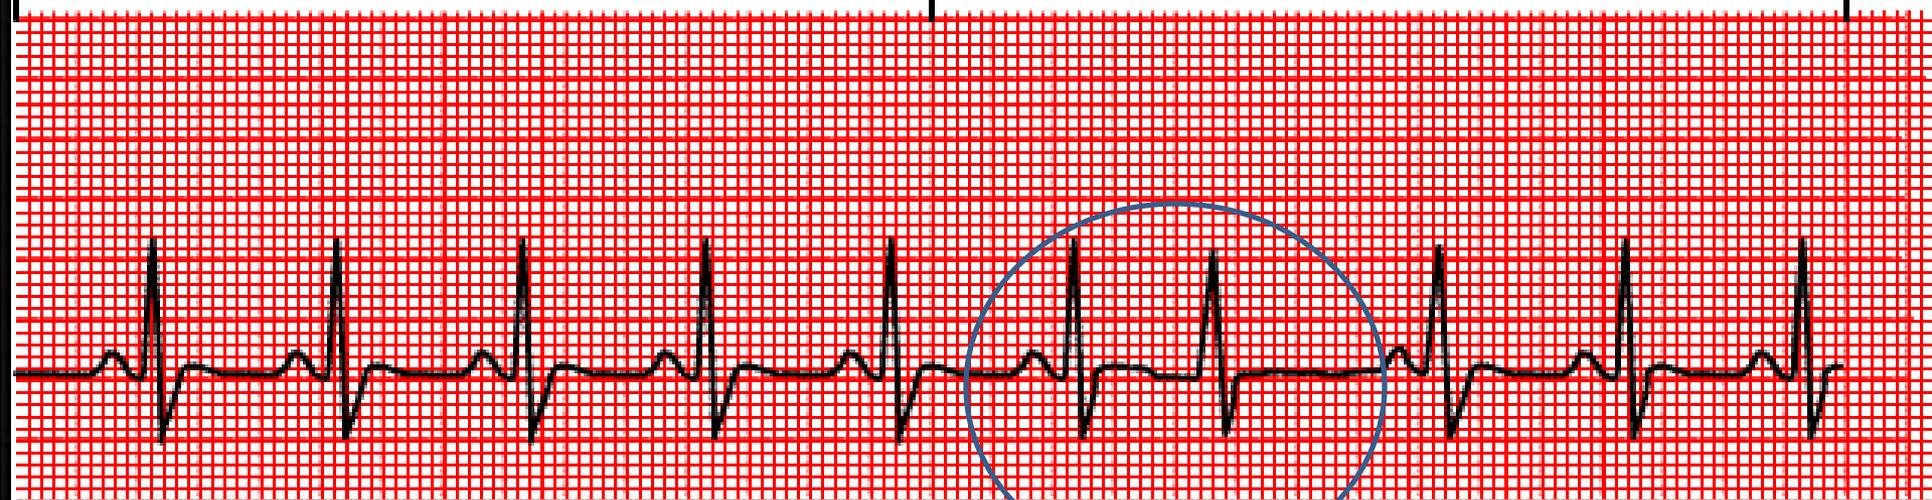

Junctional Tachycardia

Premature Junctional Complex

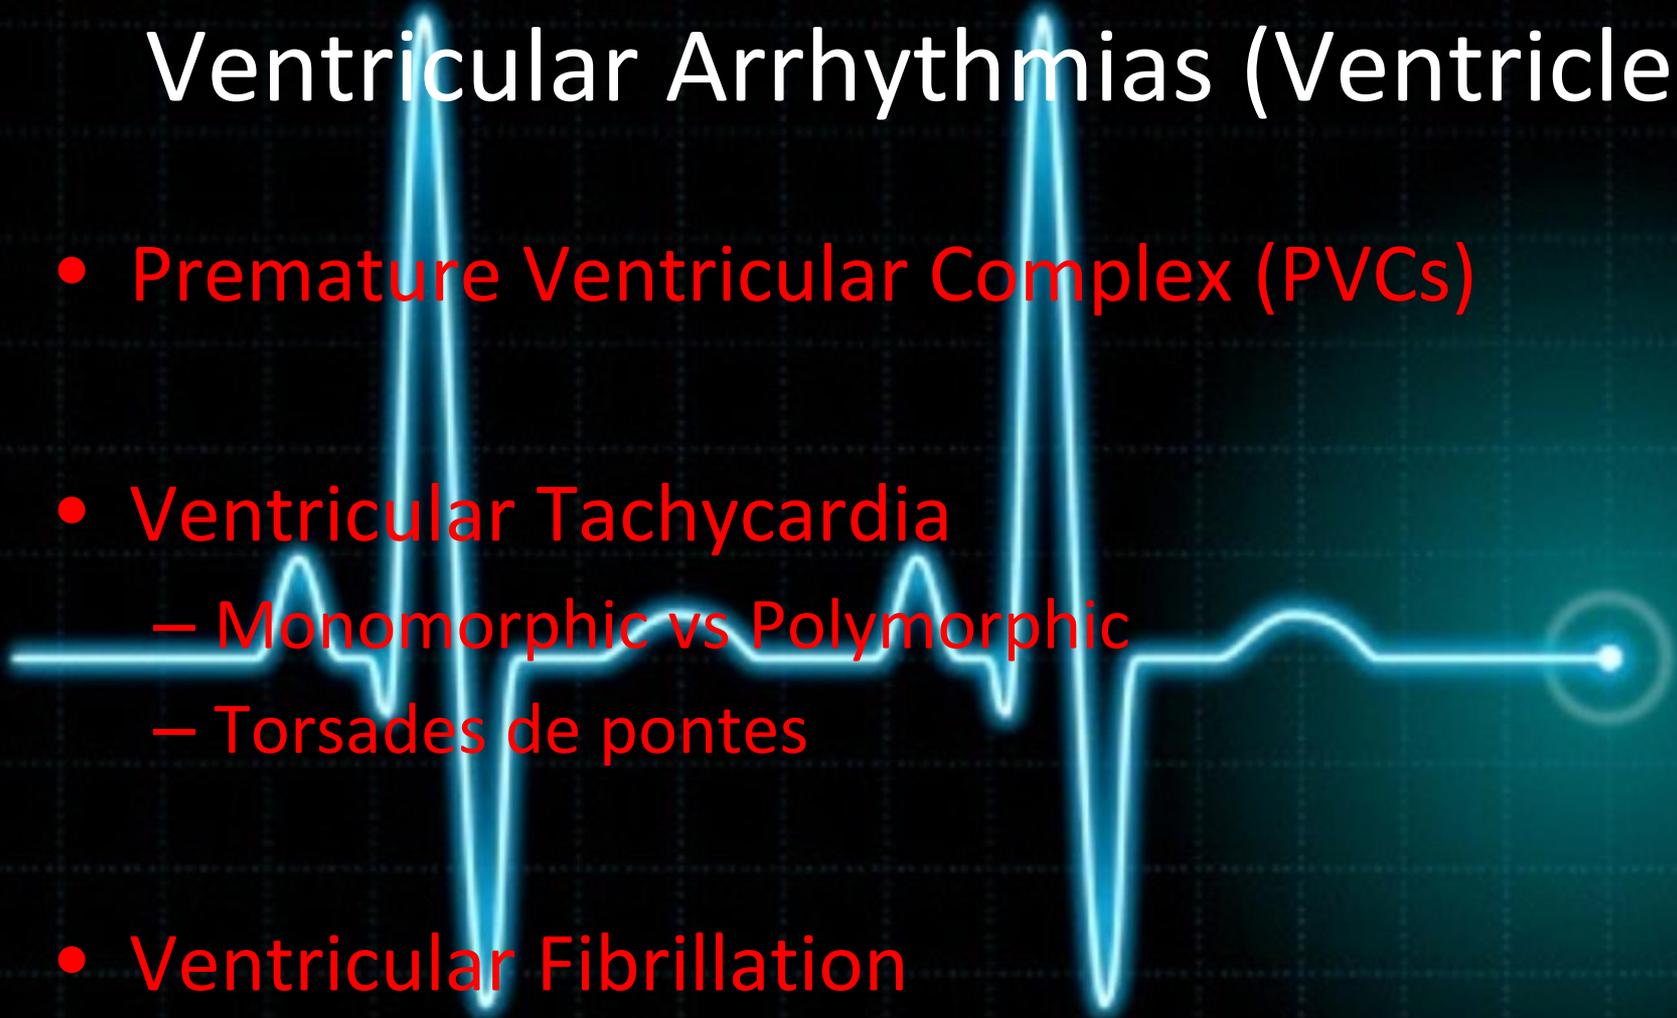

PREMATURE JUNCTIONAL CONTRACTION

HEALTH INTERACTIVE © 1999 - WWW.RNCEUS.COM

Ventricular Arrhythmias (Ventricle)

- Premature Ventricular Complex (PVCs)
- Ventricular Tachycardia
 - Monomorphic vs Polymorphic
 - Torsades de pontes
- Ventricular Fibrillation
 - Coarse vs Fine

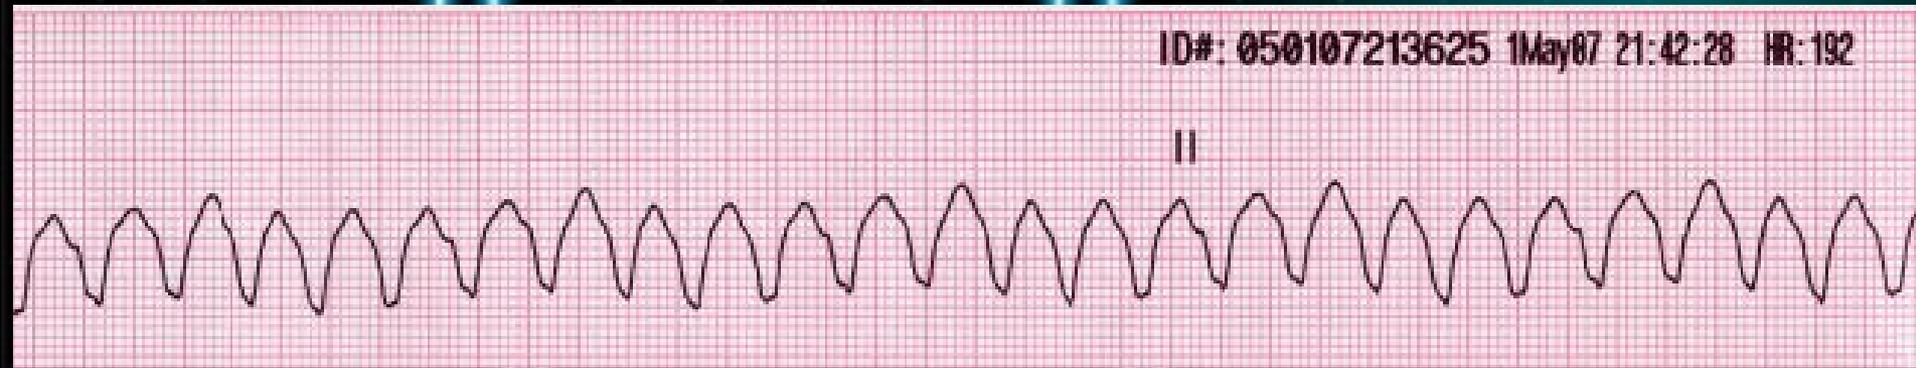

Premature Ventricular Complex (PVCs)

Monomorphic Ventricular Tachycardia (V-tach)

ID#: 050107213625 1May87 21:42:28 HR:192

II

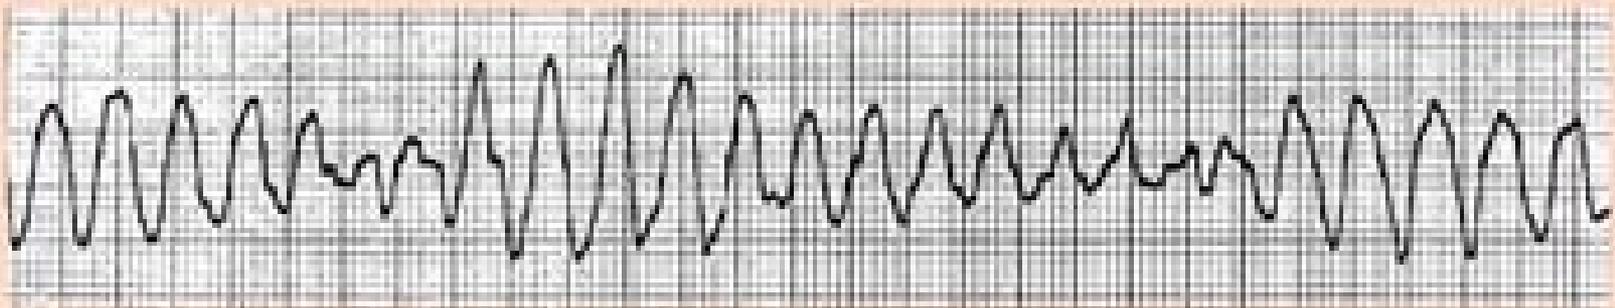

Polymorphic Ventricular Tachycardia (V-tach)

Torsades de Pointes

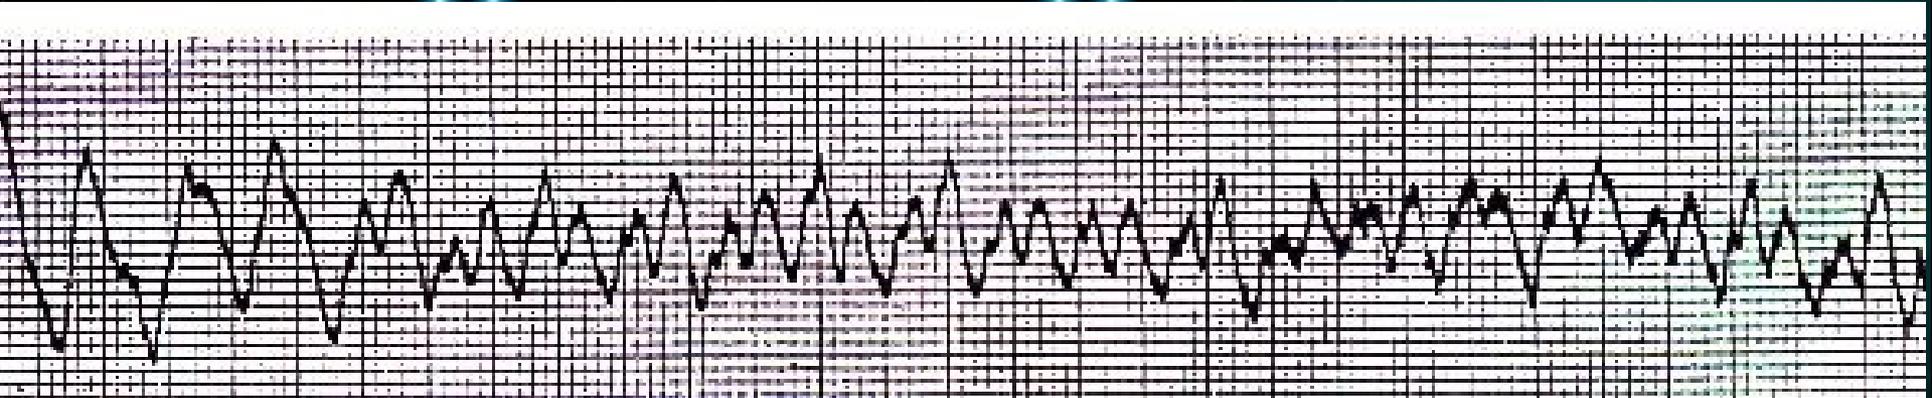

Torsades de Pointes

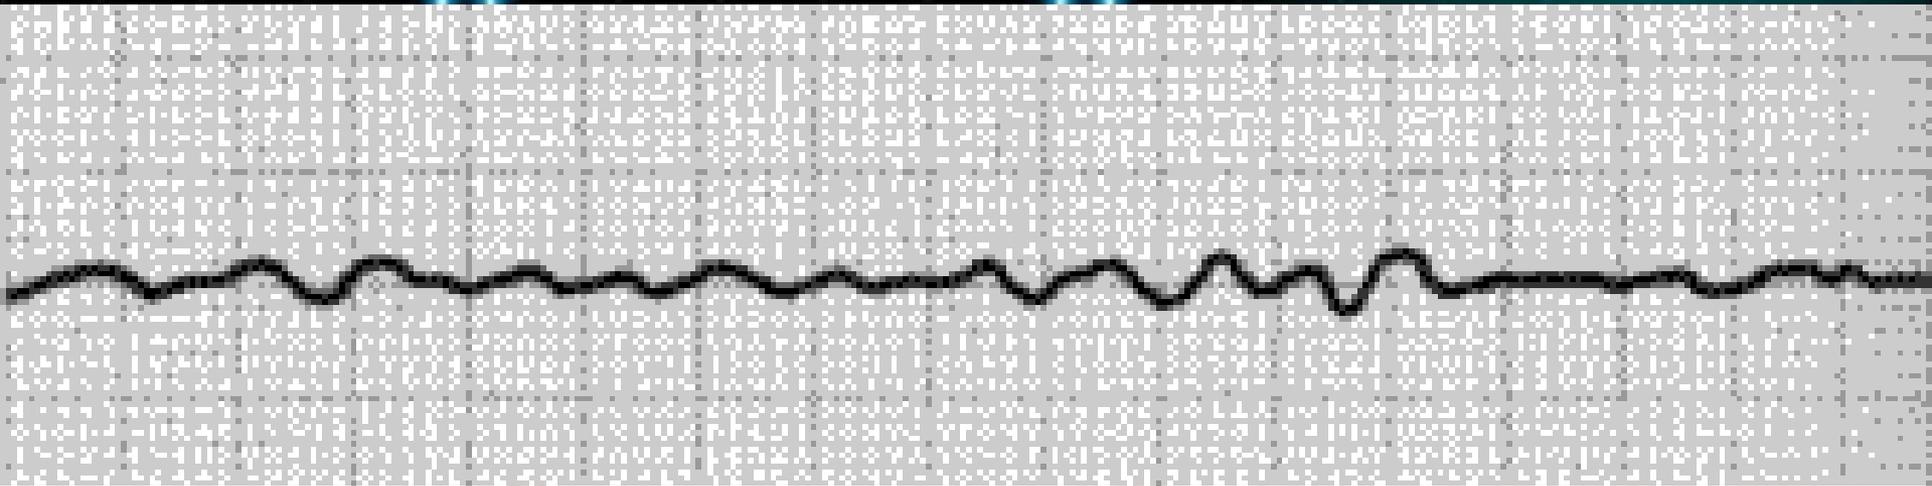

outline looks like a party streamer

Coarse Ventricular Fibrillation (V-fib)

Fine Ventricular Fibrillation (V-fib)

Other Rhythms

- Atrioventricular Blocks

- 1st Degree

- 2nd Degree

- type 1

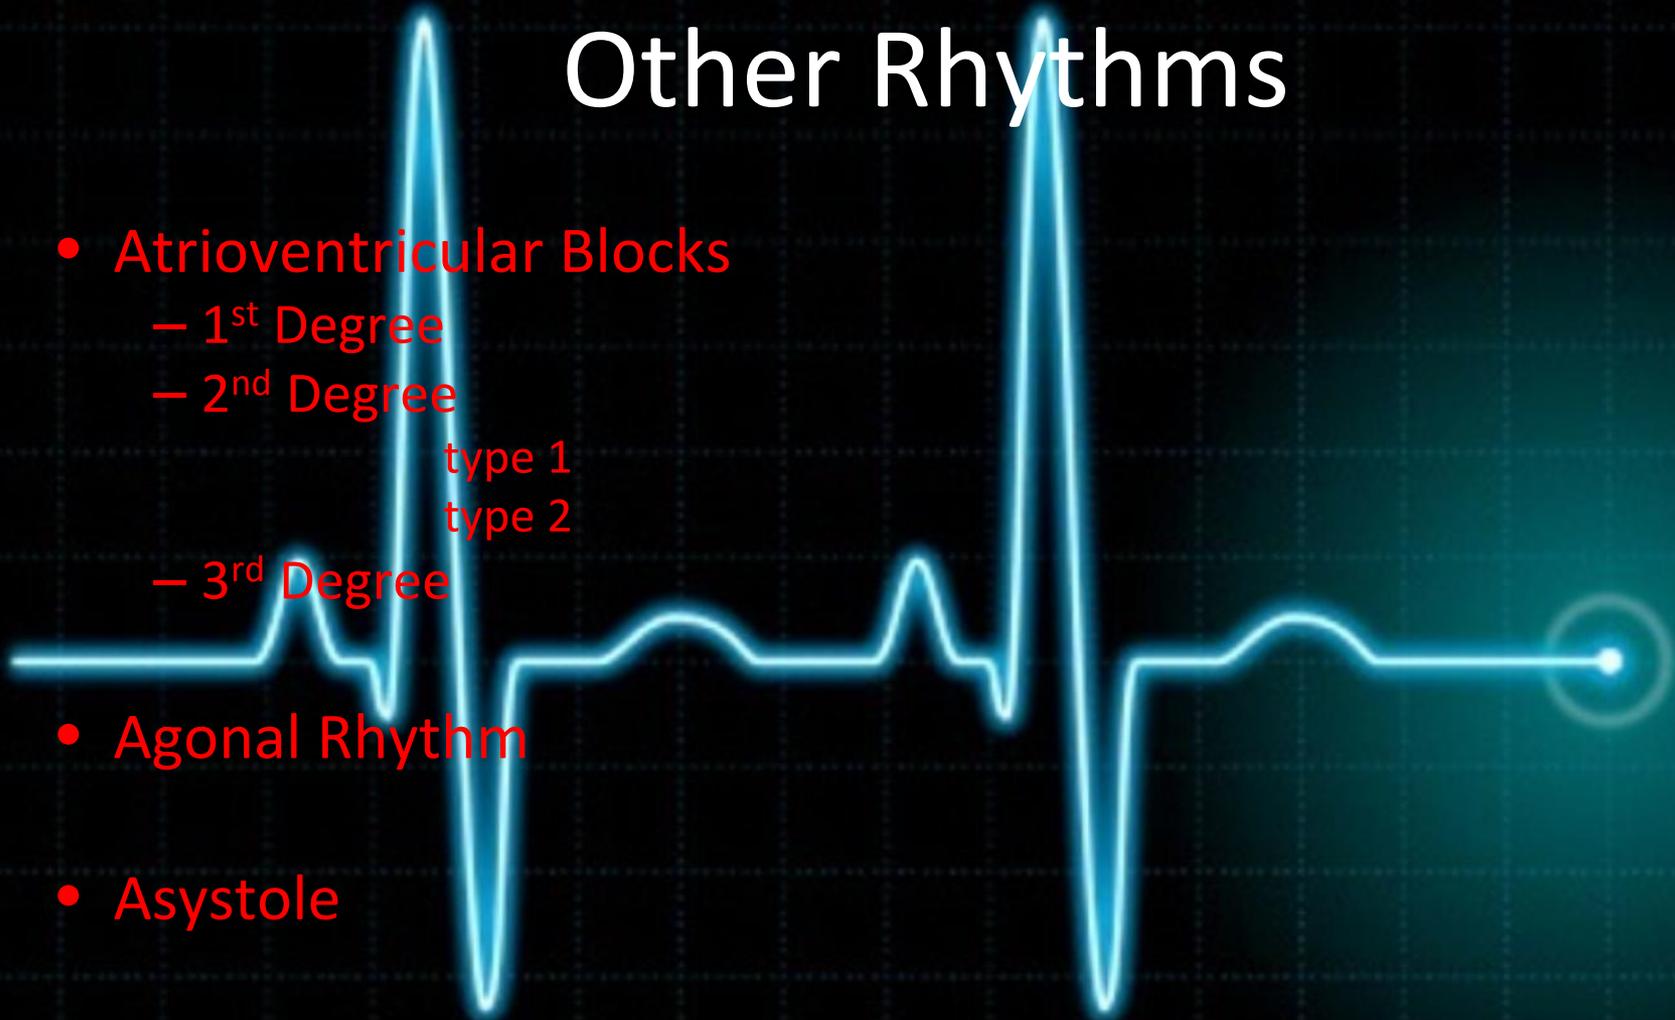

- type 2

- 3rd Degree

- Agonal Rhythm

- Asystole

- Pulseless Electrical Activity

1st Degree AV Block

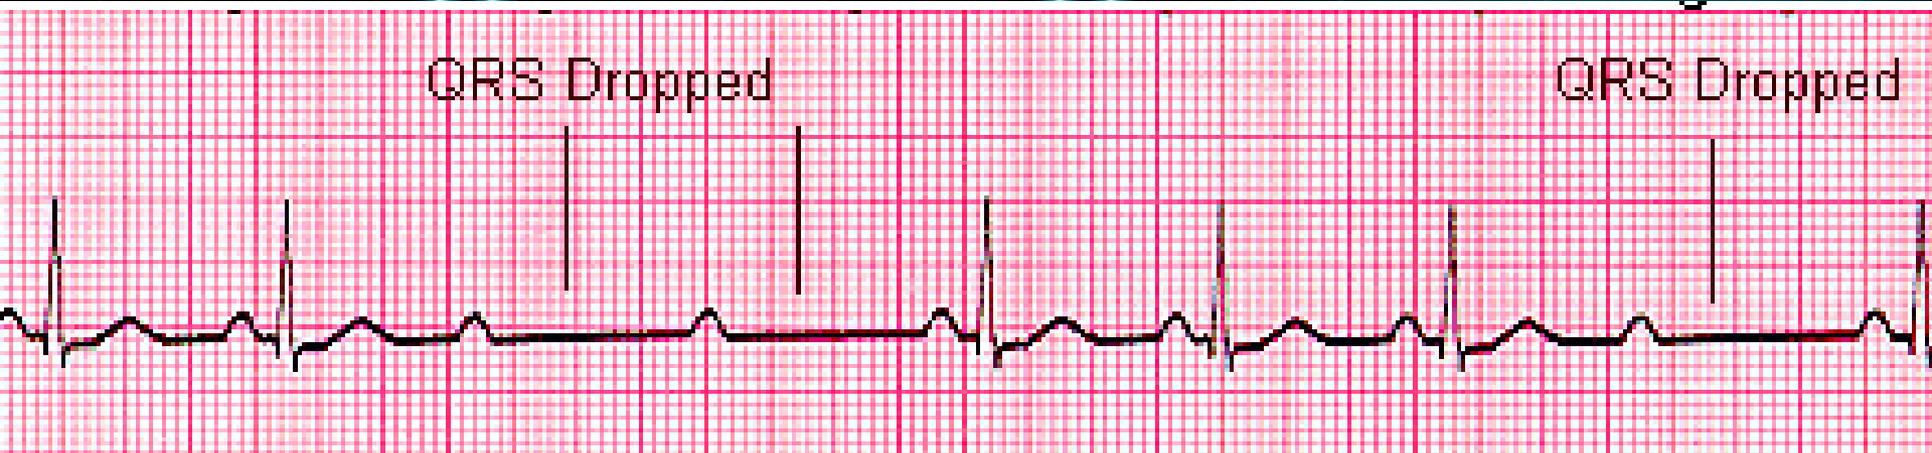

First-Degree AV Block

2nd Degree AV Block type 1 (Mobitz I / Wenkeback)

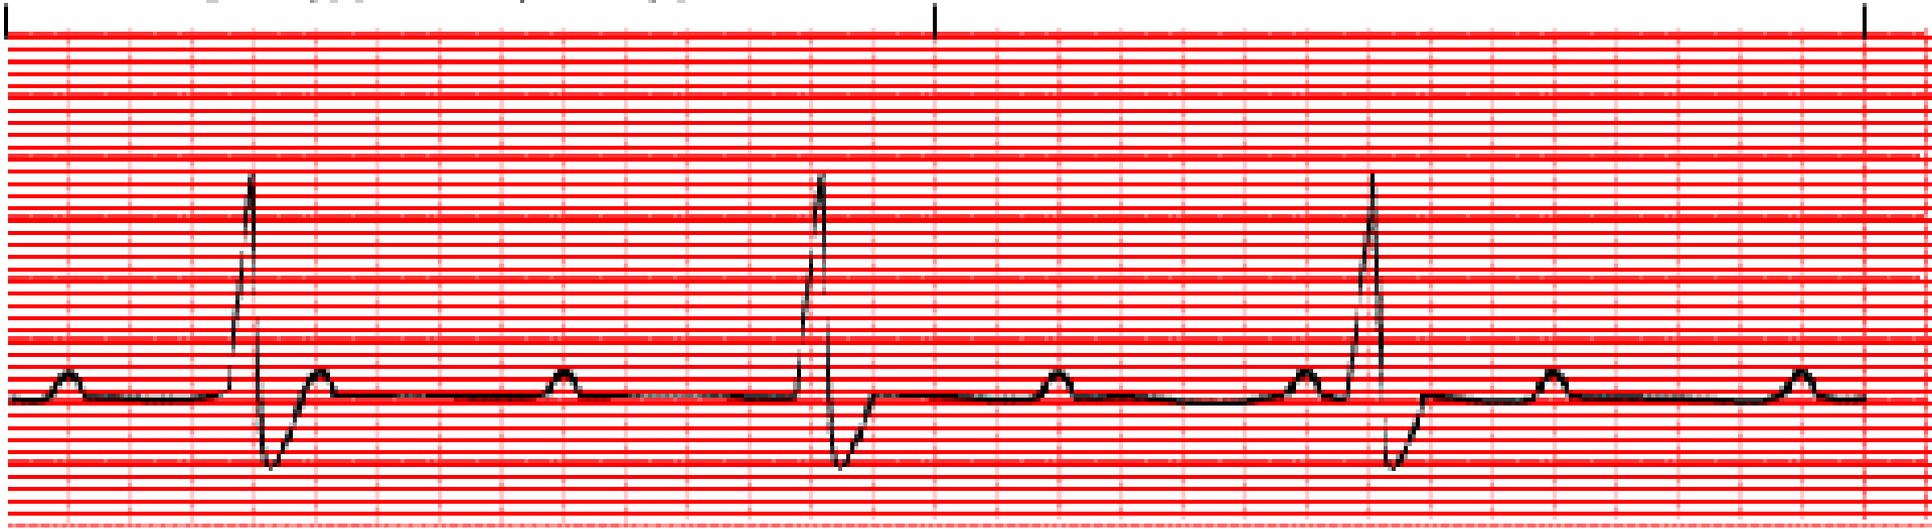

2nd Degree AV Block type 2 (Mobitz II / Hay)

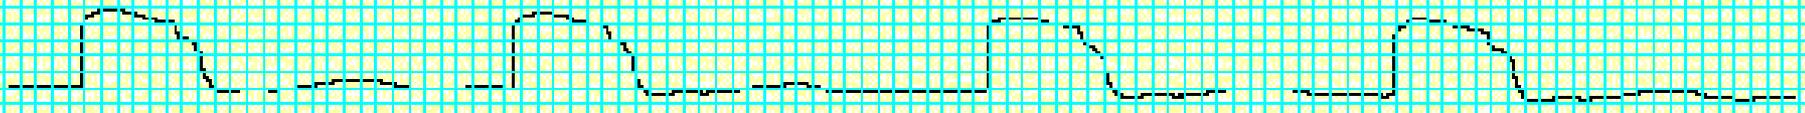

3rd Degree AV Block (AV Dissociation)

THIRD DEGREE (COMPLETE) AV BLOCK

Quick Tips

Know your 5 H's and 5

Memorize the 5 keys to breaking down any rhythm.

Know your general Anatomy

Remember these numbers-

300-150-100-75-60-50

But most important:

ABC's, BLS, Check Your
Equipment and Teamwork!!
